Contaminación de aguas subterráneas Centro Panamericano de Ingeniería Sanitaria y Ciencias del Ambiente (CEPIS), 1993 Compilación sistematizada de referencias bibliográficas sobre contaminación de aguas subterráneas con tópicos asociados a la degradación de la calidad de los recursos hídricos por actividades antropicas. Pretende llegar a técnicos, administradores e investigadores del sector agua, saneamiento y ambiente. Reproduce textos completos que han sido seleccionados por su relevancia y alto interés. Con este criterio se incluye un texto que permite introducir a los usuarios los conceptos básicos de hidrogeología aplicados a la contaminación de acuíferos y otro sobre el comportamiento de los contaminantes en el subsuelo. Un segundo grupo de textos enfoca las actividades del hombre como fuentes generadoras de cargas contaminantes; se presentan estudios de casos sobre las actividades más comunes. Los conceptos sobre modelos matemáticos de simulación de la contaminación de acuíferos, la vigilancia y el estado del arte de la recuperación de acuíferos, también han sido considerados. Incluye también un conjunto de textos sobre la gestión del recurso hídrico subterráneo, un documento cuyo centro de interés es la protección del acuífero tomando en consideración la política de los órganos administradores del recurso agua; le sigue un texto sobre la problemática de los niveles de la planificación (regional, local, áreas restringidas y grandes áreas). Finalmente se han incorporado textos de leyes y reglamentos.

Ramon Margalef, ecólogo de la biosfera. Una biografía científica Narcís Prat,Joandomènec Ros,Francesc Peters,2015-10-23 Ramon Margalef (1919-2004) fue el primer catedrático de Ecología y uno de los mejores investigadores de España en la segunda mitad del siglo XX. La primera parte de este libro ofrece una panorámica completa de su labor científica, en la que se destacan aspectos esenciales que están relativamente olvidados aunque siguen siendo muy vigentes. La segunda parte recupera un trabajo clásico sobre los organismos indicadores en la limnología que Margalef publicó en 1969 y lo compara con la situación actual de estos estudios, lo que demuestra cómo ya en aquel momento Margalef sentó cátedra en este tema. Con el presente homenaje, invitamos a quienes todavía no conocen la obra del eminente profesor a adentrarse en su legado, de gran importancia no solo para la ecología europea, sino también mundial.

Desarrollo Sustentable María Veronica Estrella Suárez,2014-10-21 La presente obra tiene como objetivo abordar con amplitud el tema del desarrollo sustentable y proponerlo como una estrategia de crecimiento sostenible en las comunidades y naciones (en especial en nuestro país), a fin de generar una propuesta para un mejor y nuevo mañana. Este eje rector fue determinado con base en lo observado en un entorno a nivel mundial, así como por las diferencias económicas y sociales, que cada día son más agudas y crecientes, debido a que hoy día millones de personas en el mundo no tienen la posibilidad de satisfacer sus necesidades básicas más elementales, como: alimentación, agua, aire limpio, educación, salud y vivienda digna.

Pillar Of Sand Sandra Postel,1999-07-06 Pillar of Sand points the way toward protecting rivers and vital ecosystems even as we aim to produce enough food for a projected 8 billion people by the year 2030. Postel shows how innovative irrigation technologies and strategies can alleviate hunger and environmental stress at the same time. And she calls for a new ethic of sufficiency and sharing in response to impending water limits.--BOOK JACKET.

The War of the Worlds: Large Print H. G. Wells,2019-03-30 No one would have believed in the last years of the

nineteenth century that this world was being watched keenly and closely by intelligences greater than man's... So begins H. G. Wells' classic novel in which Martian lifeforms take over planet Earth. As the Martians emerge, they construct giant killing machines - armed with heatrays - that are impervious to attack. Advancing upon London they destroy everything in their path. Everything, except the few humans they collect in metal traps. Victorian England is a place in which the steam engine is state-of-the-art technology and powered flight is just a dream. Mankind is helpless against the killing machines from Mars, and soon the survivors are left living in a new stone age. Includes the original Warwick Goble illustrations.
