Cultures of Devotion Frank Graziano, 2007 Spanish America has produced numerous folk saints -- venerated figures regarded as miraculous but not officially recognized by the Catholic Church. Some of these have huge national cults with hundreds -- perhaps millions -- of devotees. In this book Frank Graziano provides the first overview in any language of these saints, offering in-depth studies of the beliefs, rituals, and devotions surrounding seven representative figures. These case studies are illuminated by comparisons to some hundred additional saints from contemporary Spanish America. Among the six primary cases are Difunta Correa, at whose shrines devotees offer bottles of water and used auto parts in commemoration of her tragic death in the Argentinean desert. Gaucho Gil is only one of many gaucho saints, whose characteristic narrative involves political injustice and Robin-Hood crimes on behalf of the exploited people. The widespread cult of the Mexican saint Nino Fidencio is based on faith healing performed by devotees who channel his powers. Nino Compadrito is an elegantly dressed skeleton of a child, whose miraculous powers are derived in part from an Andean belief in the power of the skull of one who has suffered a tragic death. Graziano draws upon site visits and extensive interviews with devotees, archival material, media reports, and documentaries to produce vivid portraits of these fascinating popular movements. In the process he sheds new light on the often fraught relationship between orthodox Catholicism and folk beliefs and on an important and little-studied facet of the dynamic culture of contemporary Spanish America.

Lived Religion Meredith B McGuire, 2008-08-22 How can we grasp the complex religious lives of individuals such as Peter, an ordained Protestant minister who has little attachment to any church but centers his highly committed religious practice on peace-and-justice activism? Or Hannah, a devout Jew whose rich spiritual life revolves around her women's spirituality group and the daily practice of meditative dance? Or Laura, who identifies as Catholic but rarely attends Mass, and engages daily in Buddhist-style meditation at her home altar arranged with symbols of Mexican American popular religion? Diverse religious practices such as these have long baffled scholars, whose research often starts with the assumption that individuals commit, or refuse to commit, to an entire institutionally framed package of beliefs and practices. Meredith McGuire points the way forward toward a new way of understanding religion. She argues that scholars must study

religion not as it is defined by religious organizations, but as it is actually lived in people's everyday lives. Drawing on her own extensive fieldwork, as well as recent work by others, McGuire explores the many, seemingly mundane, ways that individuals practice their religions and develop their spiritual lives. By examining the many eclectic and creative practices -- of body, mind, emotion, and spirit -- that have been invisible to researchers, she offers a fuller and more nuanced understanding of contemporary religion.

Sacred Stories, Spiritual Tribes Nancy Tatom Ammerman, 2014 Nancy Tatom Ammerman examines the stories Americans tell of their everyday lives, from dinner table to office and shopping mall to doctor's office, about the things that matter most to them and the routines they take for granted, and the times and places where the everyday and ordinary meet the spiritual. In addition to interviews and observation, Ammerman bases her findings on a photo elicitation exercise and oral diaries, offering a window into the presence and absence of religion and spirituality in ordinary lives and in ordinary physical and social spaces. The stories come from a diverse array of ninety-five Americans — both conservative and liberal Protestants, African American Protestants, Catholics, Jews, Mormons, Wiccans, and people who claim no religious or spiritual proclivities — across a range that stretches from committed religious believers to the spiritually neutral. Ammerman surveys how these people talk about what spirituality is, how they seek and find experiences they deem spiritual, and whether and how religious traditions and institutions are part of their spiritual lives.

Early and Late Latin J. N. Adams, Nigel Vincent, 2016-10-18 This book addresses the question of whether there are continuities in Latin spanning the period from the early Republic through to the Romance languages. It is often maintained that various usages admitted by early comedy were rejected later by the literary language but continued in speech, to resurface centuries later in the written record (and in Romance). Are certain similarities between early and late Latin all that they seem, or might they be superficial, reflecting different phenomena at different periods? Most of the chapters, on numerous syntactic and other topics and using different methodologies, have a long chronological range. All attempt to identify patterns of change that might undermine any theory of submerged continuity. The patterns found are summarised in a concluding chapter. The volume addresses classicists with an interest in any of the different periods of Latin, and Romance linguists.

Cárdenas Compromised Ben Fallaw, 2001-08-17 *Cárdenas Compromised* is a political and institutional history of Mexico's urban and rural labor in the Yucatán region during the regime of Lázaro Cárdenas from 1934 to 1940. Drawing on archival materials, both official and popular, Fallaw combines narrative, individual case studies, and focused political analysis to reexamine and dispel long-cherished beliefs about the Cardenista era. For historical, geographical, and ethnic reasons, Yucatán was the center of large-scale land reform after the Mexican Revolution. A long-standing revolutionary tradition,

combined with a harsh division between a powerful white minority and a poor, Maya-speaking majority, made the region the perfect site for Cárdenas to experiment by launching an ambitious top-down project to mobilize the rural poor along ethnic and class lines. The regime encouraged rural peasants to form collectives, hacienda workers to unionize, and urban laborers to strike. It also attempted to mobilize young people and women, to challenge Yucatán's traditional, patriarchal social structure, to reach out to Mayan communities, and to democratize the political process. Although the project ultimately failed, political dialogue over Cárdenas's efforts continues. Rejecting both revisionist (anti-Cárdenas) and neopopulist (pro-Cárdenas) interpretations, Fallaw overturns the notion that the state allowed no room for the agency of local actors. By focusing on historical connections across class, political, and regional lines, Fallaw transforms ideas on Cardenismo that have long been accepted not only in Yucatán but throughout Mexico. This book will appeal to scholars of Mexican history and of Latin American state formation, as well as to sociologists and political scientists interested in modern Mexico.

A lo largo de sus casi cien entradas, el Diccionario de Religiones en América Latina da cuenta de las distintas maneras en que se viven las prácticas, doctrinas, rituales, cultos y experiencias religiosas en diferentes puntos de América Latina. En ese sentido, el análisis abarca aspectos que confluyen inminentemente con la religión, tales como la política, la historia y la cultura de los diferentes pueblos latinoamericanos.

Clinical Handbook of Transcultural Infant Mental Health J. Martin Maldonado-Duran,Andrés Jiménez-Gómez,María X. Maldonado-Morales,Felipe Lecannelier,2019-09-24 This handbook provides a review of relevant topics concerning the interface between culture and mental health, with a particular focus on child-rearing practices and transcultural issues in the perinatal period, infancy, and early childhood. It discusses how to work with infants and families from diverse backgrounds and addresses the most common issues that medical and mental health experts may encounter when working with individuals from other cultures. Chapters examine the considerable range of child-rearing strategies and how families from various cultural groups approach issues such as infant sleep, feeding practices, and care during pregnancy. In addition, chapters address conditions that are seen mostly within a particular sociocultural context and are "culture bound" syndromes or states. The handbook concludes with the editors' recommendations for future research directions. Topics featured in this

handbook include: Prejudice, discrimination, and stereotyping within the clinical field. Cultural responses to infant crying and irritability. Cultural issues in response to chronic conditions and malformations in infancy. The healthy immigrant effect. The use of folk and traditionally therapeutic remedies. The Clinical Handbook of Transcultural Infant Mental Health is an essential resource for researchers, clinicians and related professionals, and graduate students in infancy and early child development, child and school psychology, pediatrics, social work, obstetrics, and nursing.
